

TR Vent

TOTAL ROOF VENTING

Add ventilation underneath roofing and siding to extend the lifespan of your building.

TR Vent is a strong entangled polymer net product that creates a cutting-edge venting system under roofing and siding.

The unique design allows for the fastest installation of any rollable venting on the market. It can be rolled onto the roof or worksite table and cut to length very easily.

Enhancing ventilation underneath roofing and siding is an ideal way to eliminate the risk of condensation and increase the lifespan of your building.

Builder Benefits

- ▶ **HUGE SAVINGS!** – There is no need to remove the old shingles when you apply TR Vent under your standing seam roof installation
- ▶ Wide roll size results in fewer seams
- ▶ Cuts with scissors & installs with staple hammer
- ▶ Promotes airflow and drainage
- ▶ Reduces environmental noise
- ▶ Meets most local codes
- ▶ Will not split, warp or rot
- ▶ Lightweight and easy to carry
- ▶ Provides no source for the promotion of mold, mildew or bacteria
